Stream: Python
Tech Module: Functions/Modules/Packages
Project: 1

Write a Python function that accepts a hyphen-separated sequence of colors as input and returns the colors in a hyphen-separated sequence after sorting them alphabetically.

Constraint: All the colors will be completely in either lower case or upper case.

Sample input 1: green-red-yellow-black-white

Sample output 1: black-green-red-white-yellow

Sample input 2: PINK-BLUE-TAN-PURPLE

Sample output 2: BLUE-PINK-PURPLE-TAN
